

HEALTH DEPARTMENT USE ONLY

Site Visit WAS NOT made and existing water supply WAS NOT evaluated, unless otherwise noted under comments.

ADEQUATE DESIGN

A review of our records indicate the existing sewage disposal system (SDS) and reserve area (where indicated) appears to be adequately designed for the proposed use. This does not imply that the existing SDS will continue to function properly for any minimum period. No conflicts were noted when the attached site plan (including footprint) was compared to those records. Exact locations may vary from records and it is suggested that the exact location of the SDS be confirmed before beginning construction.

INADEQUATE DESIGN

Existing SDS inadequate. Applicant must apply at the Health Department for a sewage disposal construction permit. Permit must be issued and a copy submitted to building inspections before Building/Zoning permit is issued.
